Software developer working professionally in the US since 2019, building front-end and full-stack applications with small-to-medium teams across startups and product companies. I care about the details that often get skipped: accessibility (WCAG), semantic HTML, cross-browser and device compatibility, and UIs that hold up under real usage. AI tooling (Claude Code, Cursor) is a core part of how I build and iterate. In November 2025 my wife and I relocated to Girona, Spain for her career, and have continued remotely at BigPixel since. Fully bilingual in English and Spanish, I'm now looking for my next role in Spain or the wider EU — ideally a full-stack position with a front-end lean, where I can keep shipping polished, production-grade web applications while leading technical direction.

EXPERIENCE

Senior Developer

BigPixel | Jan 2025 - Present | Remote | USA

- Led a mobile and tablet responsiveness initiative across a Bootstrap 3 codebase, resolving 100+ tracked issues spanning iOS-specific keyboard, scroll, and layout bugs, modal stacking, and viewport layouts.
- Conducted cross-browser and device testing across Chrome, Safari, and iOS as part of the responsiveness initiative.
- Delivered features including a country selector with SVG flags and keyboard navigation, photo capture in private browsing, and dashboard routing improvements.
- Extended .NET Core API controllers and improved LINQ query performance against Azure SQL, supporting new dashboard endpoints for equipment filtering, inspection dates, and work order history.
- Managed releases across test, staging, and production via Azure Pipelines in a cross-functional team of ~5.

Founding Engineer

Ruffo (YC S22) | Jan 2024 - Nov 2024 | Remote | USA

- Sole engineer on a greenfield Next.js application self-hosted on AWS, owning all architecture and rendering decisions from PoC to prospect-ready product.
- Built an AI role-play assistant integrating OpenAI and custom LLMs for context-aware web and phone call interactions.
- Ran a parallel Python/FastAPI backend on Fly.io connected to a PostgreSQL database on Supabase.
- Managed deployments via Porter on AWS, handling environment configuration.
- Advised co-founders on technical direction across product and operations.

Senior Developer

Ironforge | Apr 2023 - Oct 2023 | Remote | USA

- Built core features for a Solana developer platform — program management dashboard, RPC Gateway configuration, API key management, billing, team management, and webhook integration.
- Developed a shareable API Playground with save/restore state, shareable URL generation, and paginated data export.
- Led development of a custom product landing page using Framer Motion and Tailwind with custom SVGs designed in Figma.

Software Engineer II

RECUR Forever Inc. | Jun 2022 - Apr 2023 | Remote | USA

- Built custom components and features for platform and brand-specific clients using Next.js, Remix, Tailwind CSS, and Material UI.
- Collaborated with the design team to build and maintain a product design system in Figma.
- Presented feature work in bi-weekly engineering demos across a cross-functional team.

Lead Developer

Freeman Company | Jun 2020 - May 2022 | Remote – New York, USA

- Led development on a mobile-first, full-stack online event conference application (Online Event Pro) built with React, Express, and AWS Serverless/S3.
- Coordinated 2–3 rotating developers (off-shore) per sprint in an Agile workflow through code reviews, daily standups, and unblocking sessions.
- Maintained and expanded a custom component library with a focus on accessibility and cross-browser consistency.
- Integrated multiple third-party services and user registration data providers.

Developer

Vessel Technologies | Aug 2019 - Jan 2020 | On-site – New York, USA

- Built a custom React product page and contributed to a Java codebase for bespoke smart home solutions.

EDUCATION

Web Development Immersive

General Assembly | Jan 2019 - Apr 2019 | New York, NY

Masters in Fundamental Rights and Public Powers

Universidad del Pais Vasco (UPV) | 2014 - 2015 - Bilbao, Spain

Bachelor in Law

PUCMM | 2008 - 2012 - Santo Domingo, Dominican Republic

SKILLS & TOOLS

- JavaScript | Typescript
 - **React (Next.js)** / Remix
 - Express | Node.js
 - HTML5 | CSS | Tailwind
 - Python (FastAPI)
 - React Query
 - Redux
 - Jira | Clickup | Linear
- AWS
 - PostgreSQL | Supabase
 - SQL | MySQL
 - Claude Code | Cursor
 - Git | Github | GitHub Actions | Bitbucket
 - Jest | React Testing Library
 - Languages: English (native)
 - Spanish (native)
